R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

Load data:

```
library(readr)
```

```
## Warning: package 'readr' was built under R version 4.2.3
```

```
olympics2024 <- read_csv("olympics2024.csv")
```

```
## Rows: 91 Columns: 7
## -- Column specification -----
## Delimiter: ","
## chr (2): Country, Country Code
## dbl (5): Rank, Gold, Silver, Bronze, Total
##
## i Use 'spec()' to retrieve the full column specification for this data.
## i Specify the column types or set 'show_col_types = FALSE' to quiet this message.
```

Including Plots

You can also embed plots, for example:

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.
